# CODE – HEA2 CREDIT ENTITLEMENTS

The Code for Sustainable Homes allows Part E Robust Details to be used and provides that credits for sound insulation in 'Health and Well-Being' (HEA 2) can be claimed without the need for on-site pre-completion sound testing. This document identifies the automatic CSH credit entitlement according to the date that the plots were registered under the robustdetails® scheme. When claiming automatic credits, please ensure you refer to the correct table and the explanatory notes.

| Number of credits | RD Wall types | RD Floor types | |
|---|---|---|---|
| | | All flats | Top Storey Flats Only (see note 4) |
| 1 | E-WM-2<br>E-WM-3<br>E-WM-4<br>E-WM-5<br>E-WM-6<br>E-WM-8<br>E-WM-15 (P)<br>E-WM-29 (P)<br>E-WT-1<br>E-WT-2<br>E-WT-3 (P) | E-FC-8 (P)<br>E-FC-13 (P)<br>E-FS-2 (P)<br>E-FT-1<br>E-FT-2(P)<br>E-FT-4(P)<br>E-FT-5(P)<br>E-FT-7(P)<br>E-FT-8(P) | E-FC-12 (P) |
| 3 | E-WM-11<br>E-WM-13 (P)<br>E-WM-14<br>E-WM-16 (P)<br>E-WM-17<br>E-WM-18 (P)<br>E-WM-20<br>E-WM-21 (P)<br>E-WM-22<br>E-WM-23<br>E-WM-24<br>E-WM-25 (P)<br>E-WM-27<br>E-WM-28<br>E-WM-30 (P)<br>E-WM-31 (P)<br>E-WS-3 (P)<br>E-WS-4 (P)<br>E-WS-5 (P) | E-FC-10 (P)<br>E-FC-14<br>E-FC-16 (P)<br>E-FC-17 (P)<br>E-FC-18 (P)<br>E-FS-1 (P)<br>E-FS-3 (P) | |

Table #32 Effective from midnight on 21 June 2018

## Notes

1. Robust Details and PCT can be used in the same building. The number of credits awarded should be based on the lower performance. For example, if the floor is subject to PCT and qualifies for 1 credit and the wall is in the robustdetails® scheme and qualifies for 3 credits, only 1 credit would be awarded

2. Whether PCT or Robust Details are used it is important to ensure the wall and floor types chosen are compatible. Robust Details combinations are described in tables 3a, b and c of the Introduction to the Robust Details Limited Handbook .

3. Credits awarded at design stage will be awarded at post construction stage (provided the development meets the Robust Details requirements) even if the credits awarded for the Robust Details specification in question have changed in the interim.

4. Top storey flats may be awarded credits based on the airborne sound performance of the floor only (in combination with the credit entitlement for any associated separating walls), noting that flats beneath will be subject to both impact and airborne sound transmission. Where a floor qualifies on this basis the credits are listed separately in the table.

5. The criteria for allocating Code credits to Robust Details aims to achieve equivalence with the credits awarded where pre-completion – or post-construction – testing (PCT) is carried out. The robustdetails® scheme is based on the principle of the performance of a whole population of specific forms of construction. The performance monitoring of the Robust Details demonstrates that if built in accordance with the required specification, the Robust Details consistently achieve the same general level of performance, in excess of the Building Regulation requirements.

6. Some of the Robust Details are suffixed with "(P)". This indicates that the credit entitlement has been allocated on a provisional basis. This applies to new and relatively low-use Robust Details for which the credit entitlement has been based on the test data used during the original assessment and where available, a limited amount of surveillance test data. Therefore, whilst credits have been awarded, the status of these Robust Details should be checked on a regular basis to ensure that the level of awards has not changed since the web site was last reviewed.

7. Please refer to www.robustdetails.com for the current table and further information.
